S i2i LIMITED

(Incorporated in the Republic of Singapore)

(Company Registration No. 199304568R)

(the “**Company**”)

**COMPANY’S SUBSIDIARY MELLON TECHNOLOGIES PTE LTD TO PROVIDE ELECTRIC
VEHICLE TRANSPORT SERVICES IN SINGAPORE**

The Company is pleased to announce that its subsidiary, Mellon Technologies Pte Ltd (“**Mellon**”), is collaborating with a leading electric vehicle manufacturer based in China to provide 100% pure electric vehicles distribution, sales (B2B and B2C) and related transport services in Singapore through various direct, indirect channels and web-based public transport companies.

The Company continues its effort to move its focus from “information to innovation” and believes that 100% pure electric vehicles (“**EVs**”) industry is an innovation which uses software, applications, IoT (internet of things) and related new technology as its major drivers for clean energy solutions. The Company believes that the effective amalgamation of innovative technology and software in EVs could possibly revolutionize the transport and related service industry. This can help position the Company as a potential lead player in the EV industry in Singapore, as it strives to take the first movers advantage. Mellon’s partnership is a pioneering effort by the Company to bring about a clean and pollution-free environment. Therefore, the Company would also work closely with policy makers and industry opinion makers as EVs start making their mark in the transport and other ecosystems.

Mellon will focus on clean energy EV based transport solutions through:

- (i) Providing 100% electric vehicle, distribution, sales (B2B and B2C) and related transport services in Singapore through various direct, indirect channels and web-based public transport companies.
- (ii) Partnering with leading software, services and application companies for providing transport services using EVs; and providing relevant after-sales services.
